Chess (Django / React)

- Developed a website to play chess online with custom positions and time control.
- Included the Stockfish chess engine to play with and to analyze games.
- Incorporated an authentication system for users to access their game history and identify themselves in the chat rooms.
- Added end-to-end tests using Cypress.

what2watch (Next.js / TypeScript)

- Built a website to browse movies and TV shows using a movie API. Integrated the React Query library to handle fetch requests.
- Used React and Chakra UI to develop the frontend.

wea (Python)

- Created a command-line tool to display an ASCII-decorated weather report in the terminal.
- Consumed weather and geocoding APIs to get the reports and coordinates for the specified location.
- Allowed settings modification to save the preferred language and location.
